## Internal and External Sensors

### IM12-CCM03-MTIS-3T-IOLC/24V

The cabinet guard IM12-CCM03-MTIS-3T-IOLC/24V monitors preset environmental limits inside the control cabinet. The environmental conditions are detected by a humidity or temperature sensor, a brightness sensor and a triangulation sensor that detects an incorrectly closed cabinet door. When exceeding or falling below the set limits an error message appears on the LED display or is reported via the switching outputs and the IO-Link interface to the host control system.

The device is supplied with 24 VDC

Teach-in can be performed manually on the device; extended parameterization is possible via the IO-Link interface.

The device is equipped with 8 screw terminals for connecting the power supply and switching outputs and can be mounted on a DIN rail acc. to EN 60715.

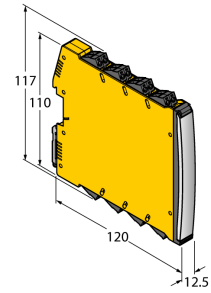

Furthermore, the device has 4 front-mounted LEDs to display the operating status (green), the error message (red) and the states of the switching outputs (2 × yellow).

The device is equipped with removable screw terminals.

- Two potential-free contacts
- Temperature detection
- Moisture detection
- Detection of distance to cabinet door
- IO-Link parameterizable
- Connection of two devices via CAN bus
- Galvanic isolation of outputs (A1/A2)
- Removable screw terminals
