

PRESS RELEASE 10/11

New VP for business unit automation systems

Oliver Merget takes over responsibility for the worldwide product management of fieldbus, HMI and RFID solutions from Turck

Mülheim, August 25, 2011 – Oliver Merget is the new vice president of Turck's business unit automation systems. The 41-year old engineer is responsible for all product management activities in the areas of fieldbus technology, HMI and RFID worldwide. Merget is the successor of Norbert Gemmeke, who took over a leading position in another company in the industry.

Oliver Merget has many years of experience in the areas of sales, product management and engineering. Before joining Turck, he worked in factory and process automation for Siemens for 12 years, before he took over the responsibility for sales process automation Germany at ABB. With his extensive know-how, the automation specialist is well prepared for his new task.

"With the two business units automation products (sensors and interface technology) and automation systems (fieldbus, HMI and RFID solutions) Turck is well positioned to adapt to the individual needs of their customers worldwide. A comprehensive portfolio, short decision-making and a distinct industry and application know-how of the employees in product management and sales, add to the formula of success of the Turck-group", says Merget.
