Occupancy Monitoring Made Simple

Easy-to-implement solution that supports social distancing

Creating a safe environment for your customers and staff is essential to doing business. For many businesses, implementing social distancing solutions is now necessary to control the flow of customers through a store.

Banner's occupancy monitoring solution makes it easy to keep a constant, accurate count of the number of customers in your store and notifies you as you approach full capacity.

- Automates the monitoring of entrances and exits using optical sensors
- Provides familiar green/yellow/red indication to customers
- Installs quick and easy, requiring no alterations to area infrastructure
- Notifies staff as customer count approaches capacity
- Offers optional reporting to identify trends in customer traffic
